

# Diseño de Aplicaciones Web

Práctica 1: Introducción al Desarrollo Backend con XAMPP

Ricardo Polock Suárez Geovani

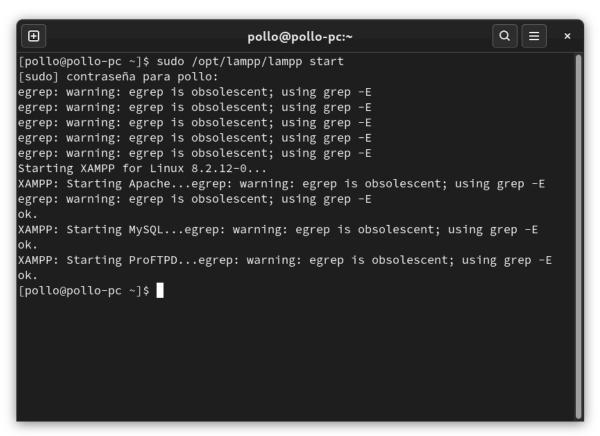

M.C.C Jesús Rojas Hernández

26 de Febrero de 2025

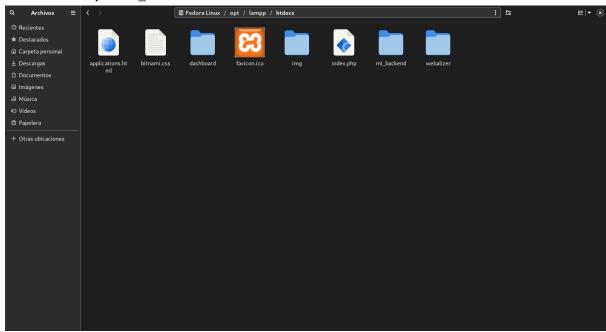

1. Ejecución de XAMPP.

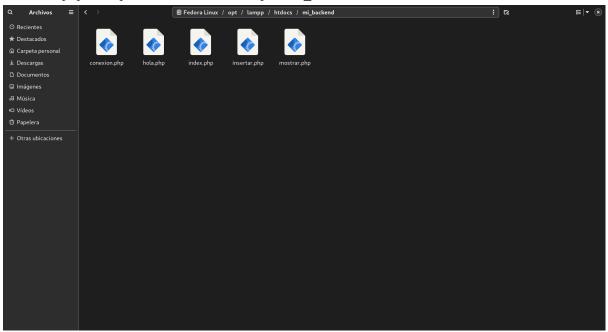

2. Creación de carpeta mi backend.

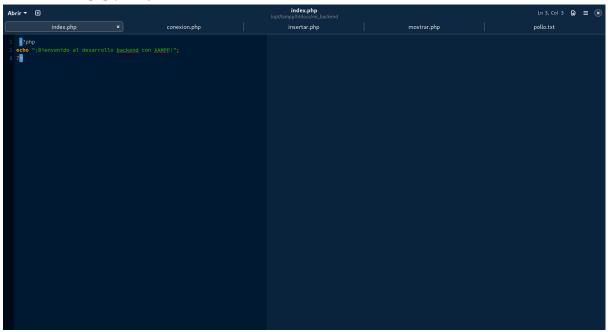

3. Archivos .php de la práctica dentro de la carpeta mi\_backend.

4. Archivo index.php y su ejecución.

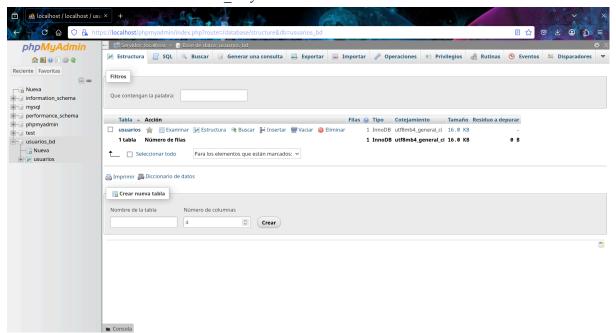

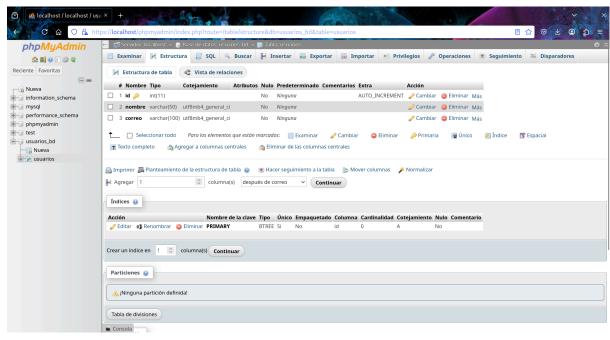

5. Creación de la base de datos usuarios db y una tabla dentro de ella llamada usuarios.

6. Archivo conexion.php y su ejecución.

```
Abrir - C | Conexion.php | Conexion.php | Magnetia.physical policy.

| Conexion.php | Conexion.php | Magnetia.physical policy.
| Conexion.php | Magnetia.physical policy.
| Conexion.physical policy.
| Conexion.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical.physical
```

Conexión exitosa a la base de datos.

7. Archivo insertar.php y su ejecución.

```
Abrir - D insertar.php conexion.php index.php insertar.php | pollo.txt | Fig. 1 | Pollo.txt | Pollo.tx
```

Conexión exitosa a la base de datos. Usuario registrado correctamente.

8. Archivo mostrar.php y su ejecución, además del registro en phpMyAdmin.

Conexión exitosa a la base de datos. ID: 1 - Nombre: Juan Pérez - Correo: juanperez@email.com ID: 2 - Nombre: Juan Pérez - Correo: juanperez@email.com
